What Are the New Suits Like?

The question will be best answered by coming here to see for yourself the radical changes Fashion has again inspired.

Coats are long-some reach almost to the hem of the skirt.

Majority are Redingotes and the Moyen Age line is seen everywhere—although sometimes coftened by a simulated belt.

Skirts are fuller than they have been in several years.

Materials include serge, gabardine and poplin. The new suits look very smart and will be warm and "comfy" for cold weather.

AMERICA'S OPPORTUNITY

IN EUROPE'S WAR

Are we unprepared? Have we no policy? Are we to drift? Is the stupendons opportunity to be forfeited?

Our currency hill has been passed, giving us al most unlimited ability to expand financially, South America has been financed by England and Germany. It is our opportunity to finance our Ameriean neighbors and to reap the reward of the patient policy as to Mexico. Are we wise enough to meet the expectation?

The Panama Canal is completed and the wes. coast of South America is at our doors.

The mercantile marine of the great powers is flocking to our flag, where it ought to stay. Are we wise enough to secure it, to keep it and ex-

The nations of the world are taking over the home supplies lest there be a shortage. Is our government wise enough to see the need of taking over the cotton croop, the wheat crop, the corn erop, and a number of other staples, at a normally high price, holding them until the world needs them and must have them?

Here there are great national possibilities and policies for which we need the power of the gov-

First-To assure such enrrency facilities as will enable us to buy back our investment securities at the low price at which they are offered.

Second-So to assist our banks as to enable us to finance the world's colonial trade which the warring nations are dropping.

Third-To take over the mercantile marine of the world so as to carry our supplies to those who either now or later will so argently need them.

Fourth-To take over and hold until needed the export staples of the country, especially those temporarily depressed. Shall our farmers sell cotton at half price now, when before the next crop is gathered it will command a war price?

Great lines of peaceful expansion and growth are in this great catastrophe, ours for the taking. Never was there such an opportunity before, and let us hope that it will never come again.

We must set now or forever regret .-- Harrington Emerson, in The Engineering Magazine,

THE IMMIGRANT ARMY

After the armies of Europe have been disbanded a new army of migration will invade the American shores. The nations now at war will be impoverished. The costs of the war will fall heavily on the shoulders of the people, and to escape the high taxes and straitened conditions millions more than the million that has come annually to the United States may be expected. What shall be done with them? The agricultural departments of the various states that need farmers to till their soils might now take a leaf from Canada's book. The Canadian government has for some years conducted an efficient adverdtising campaign to people its agricultural provinces. The states of the Union have now a chance to get the best farmers of Europe. WOMEN AND WAR

The women's peace parade in New York City recently was impressive as a protest against war but not entirely convincing as an expression of feminine sentiment. It is to be taken as a prophecy of the future woman, perhaps, rather than an expression of woman as she is today and always

One wonders how many of these same women, at a social gathering, would turn their backs on a military man to talk with a male peace enthusiast. How many of them can refrain from boasting, on oceasion, their soldier ancestors and relatives, regardless of the cause those soldiers represent? How many of them, at the first threat of war, would refrain from shonting "Our Country, right or wrong!" and sending their own sons to the front? Woman has always loved a uniform. And that has been one of the two most potent encouragements of war. Even while woman has been the chief sufferer, she has sent man to the front with her blessing, and has received him with admiration on his return. There is notility and self sacrifice in it, but there is also the primitive savagery that prefers the fighter to the intellectual and moral type.

As the New York World remarks, "If women and religion were to unite against war, there would be no more war! Since religion shows little promise of effective opposition, it seems to be up to the women.

COMMON PEOPLE WILL DECIDE ON WAR HEREAFTER'

-Senator Burton

"When this fearful conflict is over," Senator Burton predicted in the United States Senate, recently, referring to the European war, "we may safely anticipate that the common people, who must hear the burdens of this strife, will have the deeision as to whether nations shall go to war."

"In attributing the conflict to militarism, which would result in 'consequences beyond the wildest conjecture," "Mr. Burton placed the responsibility upon the "overwhelming authition of certain sov ereigns not yet come to realize that they are not the state."

KING GEORGE AND COUSIN WILHELM

The King of England is the first consin of both the Kaiser and the Czar of Russia. The mother of the latter, the Empress Dagmer, is a sister of th Dowager Queen Alexandria, while the mother of the German Kaiser was a sister of the late King Edward, the father of King George. But as nearly as ean be learned, with the service somewhat hampered by eensorship, no arrangements have yet been made for a family rennion this summer.--lronton Semi-Weekly Register.

WET AND DRY TERRITORY.

In view of the wet and dry vote to be held in November, the following facts will be of interest:

Nine states which before January 1 19th, practed prohibition laws were: Kansas, Maine, Mississippi, North urolina, North Dakota, Oklahoma, ennessee, West Virginia and Georgia They have a population of nearly 15,

There are t7 states in which 50 pe ent of the population live in so called o-license territory. These are Alabama, vrkausas, Colorado, Florida, Idaho, In hana, Iowa, Kentucky, Louisiana, Min iesota, Nelcraska, New Hampshire South Carolina, South Dakota, Texas ermont and Virginia.

There are 13 states in which 25 pe cut of the population live in no license territory, namely: California Delaware, Illinois, Maryland, Massa classetts, Michigan, Missouri, Uhio, Ore gon, Utah, Washington, Wisconsin and Wyoming. At different times 23 statehave adopted the policy of prohibition ontrol by liceuse. Of the nine dr states the majority have been dry bu few years and one, West Virginia vent dry on July 1st. Statewide pro dibition campaigns are on this fall n Virginia, Ohio, California, Washing on and Oregen.

CUT SILAGE CORN AT THE RIGI

There is a tendency among many armers to cut come for silage before re well denied and the upper leave the stalk are still green. Sometimes account of drouth most of the lower saves will dry before the grains have dented. In this case it is much belle callow the kernels to mature sufficient cossary that the silage he mois nough to pack well in the sile, and, if the earn stalks and leaves are rathe dry when the kernels are properly nertured for silage making, the corr should be wet before it is run through the silage entter. It is true the silage may be more palatable if the corn is green, but the feeding value of the silage may be increased from 10 to 20 per cent by allowing the corn to stand it the field one week,

ROOSEVELT'S THREE STAGES.

(From The New York Sun.) Whenever the Calonel discusses the tariff, as he did yesterday in Louisiana. he illuminates a subject which less wise and daring statesmen not infrequently obscure by their outgivings. With respect of it, the Repuldicans are hopelessly wrong; the Democrats are vieionsly ignorant; only the Colonel knows. This much he confesses with that re-Inctant self depreciation which so well becomes him.

There have been three distinct periods in the Colonel's progress toward his present assurance as to the turiff Problem. The first of them covers the days when free trade was proud to enroll him under its banner. The third is the final period, in which a commission engages his ardent devotion.

The second period? Alas! The second period was one of transition, doubt and perplexity, if doubt and peridexity ever have assailed the Calonel, and It is the lasting misfortune of his country. men that this interval included the seven years, five months and eighteen days of his administration as President during which he did nothing to settle the controversy. How happy the nation might be if the days of the Columb's ascendency had only coincided with one of his pras of confidence on this yex ntions question!

It is true that nature and a woman's work has produced the grandest remedy for woman's ills that the world has ever known. From the roots and herbs of the field, Lydia E. Pinkham, forty years ago, gave to womankind a remedy for their peculiar ills which has proved more efficacious than any other combination of drugs ever compounded, and today Lydia E. Pinkham's Vegetable Compound is recognized from coast to coast as the standard remedy for woman's ills.

In the Plnkham Laboratory at Lynn, Mass., are files containing hundreds of over their own signatures that they have regained their health by taking Lydla E. Pinkham's Vegetable Compound; and in some cases that it has saved them from surgical operations.
